## Our Services

Angioplasty

CCSVI

Pacemakers

Angioplasty is an endovascular procedure to widen narrowed or obstructed arteries or veins, typically to treat coronary obstructions. A deflated balloon is passed over a wire into the narrowing and then inflated to a fixed size; then a stent is implanted if needed.

[Learn more](#)

CCSVI, or Chronic Cerebro-Spinal Venous Insufficiency, is a condition in which the jugular and azygous veins, which drain blood from the brain and spinal cord to the rest of the body, are narrowed, malformed, missing or otherwise blocked.

[Learn more](#)

The Heart beats on a rhythm and rate according to the body demands, this is controlled by electric stimulation originated and transmitted on an organized system, the place where this electricity is originated is called sinus node.
