# Medical Tourism by The Clinics of the Heart in Mexico's Beautiful Maya Riviera

November 22nd, 2014

Thank you for your interest in the CCSVI and stem cell treatments performed by Dr. Rafael Moguel and his team of specialists at The Clinics of the Heart located in the modern Costamed Hospital in Cozumel Island and now at the new Costamed Hospital in Playa del Carmen, Mexico.

The treatment, known as the "liberation" is a balloon angioplasty procedure of the jugular and azygous veins to restore blood flow by un-blocking them.

The Clinics of the Heart is a pioneer treatment center having began treating multiple sclerosis in June 2010 documenting and posting our findings online for all to see.

<http://www.youtube.com/watch?v=GwGAszXzpQc>

In addition to the level of experience that treating almost 650 ms patients has given us, we offer ground breaking techniques and products like the Paclitaxel medicated balloons that are designed to reduce the possibility of restenosis.

Optional CCSVI venoplasty + stem cell treatment

The combined CCSVI angioplasty / stem cell treatments offer more ways to obtain improvements, the first by enhancing blood flow to the brain thru balloon angioplasty of the jugular and azygous veins, the second by increasing the chance for neuron recovery in the presence of new cells (stem cells). We expect maximum benefits while performing both procedures at the same time.

Our scheduling process is rather simple and straightforward as you only need to follow these very simple instructions:

1. Select your desired dates for travel and treatment.
2. Email the treatment coordinator at [info@cardioabroad.com](mailto:info@cardioabroad.com) to check date availability.
3. Reserve your flights (Allow for at least a 7 night stay in Cozumel Island or Playa del Carmen )
4. Forward your flight itinerary to [info@cardioabroad.com](mailto:info@cardioabroad.com)
5. Receive your confirmation.

At the Clinics of the Heart we are as proud of what we do as we are of what we don't do, and that is we do not cut corners, the most experienced team of CCSVI medical and stem cell specialists utilizing the latest and most modern equipment is permanently on staff to ensure outstanding results.

I hope that this information answers your questions and I look forward to being of service to you.

Andrés Brakke/CCSVI Treatment Coordinator
