## TESTIMONIES

[Make an appointment](#)

Dear Doctors and Staff at Clinics of the Heart,

We just wanted to take a minute to thank you from the bottom of our hearts for the care you gave Pat during our time in Los Cabos. We learned more about his heart from you than we had ever known. We were so thankful for the immediate emergency care you provided. You always kept us informed of the next step and no one ever left his side! You are an amazing team and we couldn't be more grateful! Because of you we can breathe a little easier knowing that what we have been doing since his heart attack 5 years ago is working! Up to this point we have been on the edge of our seat always wondering when the next heart attack would happen and if he'd survive. Thank you for peace of mind!

Thank you so much,

## Ria and Pat

---

I am so grateful for the treatment and care I received from everyone at the Clinics of Heart, I can never thank the medical team enough for all they have done for me.

Thank you for everything and have a wonderful day. I cannot express how wonderful it is to be able to walk and talk properly again. I recommend the Clinics of Heart to everyone seeking the Liberation Treatment. If anyone sees the videos and it can change their minds or help to make a decision on whether or not to have the treatment.....it will be "one more person" who can have their life back.

## Dannette

---

Hi Andres,

It's been almost a year since my wife (Deb H.) had the procedure at Clinic of the Heart. Her condition remains much improved. She has more energy than she has had in many years, she has been able to go off Copaxone and has reduced her Gabapentin by half. Certainly our trip to Cabo was the most rewarding experience in memory, and continues to be.

## Chris H.

---

I was treated in Cabo April 2011.....it is real and they are amazing. The surgery has improved my life significantly. I can feel my hands and feet again, my gait is steadier, my bladder control is better, no fatigue, I have lost 15lbs since having it done because I am exercising everyday....walking on the treadmill and strengthening and balancing exercises I wasn't able to balance enough or have any energy to do it. I am retraining muscles. Go and get it done...amazing....

## Tana Taylor

---

My name is Yvonne and I'm from Ontario, Canada. I had the CCSVI-procedure done in Mexico and it couldn't have been a better experience. My husband accompanied me for which I am forever grateful! Every person, from treatment coordinator and assistant

coordinator, administrators, doctors, nurses, cleaners involved in the Clinics of the Heart at Amerimed Hospital were very diligent at making you feel at home and comfortable , truly a Hospital with a big heart.

Every day we were greeted by the cleaning staff opening the doors for us and then the administrative staff, Adrian, Edouardo, Jacqueline, Cathy and more to tell us what needed to be done next, the doctors and coordinators made sure that I was understanding everything and there was nothing to worry about, most of the staff spoke English! Our stay at The Marina Fiesta Resort was all arranged by the coordinators beforehand and we were given a beautiful big room that was cleaned every day by Bianca, a very nice lady, also with a big heart. The staff, the chief concierge Alberto Miguel and all the busboys all wanted to make you feel welcome, what a good experience this was. Last but not least, the weather was gorgeous, every day was blue sky and sun, unbelievable! We thanked God for it all.

---

My name is Sherry and I have just returned from my liberation treatment in Cabo San Lucas, Mexico. I cannot tell you how happy and impressed I was by the excellent care and treatment I received while I was there. The doctors and nurses were so kind, knowledgeable, considerate and helpful in every way. When I arrived in Mexico, I was tired, drained, pale with the usual symptoms of M S. I was unable to move my legs, feet and my left arm or hand which was closed into a fist. I was unable to open it. I was troubled with double vision and eyes that actually jumped, which sometimes left me unable to see. During the operation, I felt so at ease, because I knew I was in good hands. After the successful procedure I could see, hear and speak more clearly. My left hand could now open, my arm that I could not move before now stretched before me with my hand opening and closings completely. After 48 hours, I had improved 40%. Time and physio will take care of the rest.

Thank you so much to the wonderful doctors and medical staff of "CLINICS OF THE HEART" Hospital in Cabo San Lucas for giving me new hope and strength.

THANK YOU, THANK YOU THANK YOU!!

## **Sherry S.**

---

I just wanted to thank you guys again for all of your kind support in giving me the opportunity to truly enhance my life before it was too late. I can safely say that my migraine headaches, severe vertigo and leg pains/paralysis are a thing of the past. Im also learning what touch and feeling are all over again.Im fortunate to have a neurologist and GP back home that are supportive of the treatment and me, and will keep up with any necessary follow ups. I cannot even begin to express my gratitude towards the whole team. You are amazing people doing amazing work with amazing results...for those who are determined not to allow the disease to take over that is;-) I came in expecting nothing more than a family vacation, and ended up leaving as the girl I knew was still deep inside. The girl who could walk and smile, and whose tears of pain and frustration turned back to tears of joy.

## Amanda C.

---

I can't tell you how much you have changed my life!!! This procedure has eliminated all of my symptoms of MS that were destroying my life. Before I had the outlook of a wheelchair or much worse and now I look forward to a great, pain free life. This is the large piece of the puzzle to eliminate MS. Every day I get stronger and live better. Everyone should get the procedure and the sooner the better. God bless you for what you have given me and my family. Thank-you so much.

## Gail S.

---

All of the doctors tell me that I was very fortunate to have received your care. They tell me that the treatment was "very aggressive", but absolutely saved my life. One even commented that I may not have had such an outcome had I been treated here in the US. There are no words to tell you how grateful we are to have been at your hospital and under your care. When I came home to hug my children, I was overwhelmed by how blessed I have been. I am determined to make use of the new life you have given me.

Thank you again. If there is anything you think I should know about my status and/or medical care, please let us know. Please tell your staff thank you and convey our gratitude and appreciation.

## Bob and Sherry Fortelny

---

I was very pleased with the attention I received. The surgery was very successful. I have stopped taking all medication for pain and I've stopped taking my muscle relaxants. I have an increase in strength and balance. My eyesight is clear. My tolerance for heat this increased. I have less fatigue. The swelling in my feet has gone down. The color in my face and limbs is better. Everyone at the hospital professional and friendly. It was the best money I ever spent. Sincerely and with many thanks.

## Dennis A

---

My sister and I just got back. We had the procedure done on Nov. 18 with good success. The clinic staff were amazing, the hospital was impeccably clean and the level of care was outstanding. Despite some negative stories about CCSVI before we left, my sister and I were undeterred. In fact, the stories gave us all the more resolve to get this done!

After the procedure, we both felt better immediately. I had more feeling in my feet, the spasticity in my right knee was almost gone, the gait in my right leg has pretty much corrected itself and we both have far more energy and stamina. My sister's symptoms were different from my own, but she has not had a blistering headache since the procedure was done, her eyes now "track" properly and she is able to watch a hockey game without feeling nauseous.

CCSVI is not a cure for MS, but it is most definitely a viable treatment option and one that should be readily available for all patients in Canada.

Perhaps the thing that struck me most about this entire experience was the sheer number of Canadians in Mexico, all waiting to have this procedure done. There were 23 patients in our week alone – from all parts of Canada – Halifax, NS to Victoria, BC and everywhere in between! We've since found out that my sister and I were patients number 302 & 303 to be done in this clinic. They hope to publish a study about their trials, but have yet to find a journal of medicine that will publish it.

## Laurie C.

---

Hello all! I am back from Cabo San Lucas, and am THRILLED with the results! I won't bore you with the incredible calibre of care received by everyone at the AmeriMed hospital, only to say I would not hesitate to return for any operation! Sorry if I run on a little long, but I am so excited.

I arrived to the hotel on Sat Oct 16/10 around 5PM and was met by the two coordinators from the hospital where we dealt with all the paperwork and what my schedule would be. To expedite, they recommended I go that evening to get my MRI, then have Sunday free to eat & drink anything ( as Andreas the awesome hospital coordinator told me to do), and go to the hospital Monday morning at 8AM for a plethora of tests and the procedure.

If you want to read more of Lori's experience click here:

## Lori MacMullen

---

My quality of life has improved drastically since CCSVI....I am so thankful for your professionalism and kindness I felt very safe in your hands..thank you for giving me my life back!!

## Nicole S.

I just got back on Saturday, and Cabo was AWESOME!! Everyone at Amerimed was just so helpful – from Andreas & Daniella to the magnificent team at the hospital. I just can't say enough good things about them!! I have PPMS, and for the first time in years I am riding my stationary bike a couple of times per day, and am not feeling all noodly afterwards!! And no pain – biggest plus for me!! Good luck and let us know what happens!

## **Lori M.**

---

I got home from Cabo San Lucas on Sept. 24 and I feel much better. I left on Sept. 16th and had the procedure on the evening of the 17th. I slept pretty much the whole next day but I noticed my balance had improved. No more dizziness, nausea gone, I can close my eyes and not start to fall backwards. I have less stiffness in legs, and less pain in knees and thighs. Less stiffness in my neck and shoulders. I have less fatigue.

Hearing improvement, eyesight improvement. Generally an overall feeling of relaxation and improved mood. I still have numbness in my arms and hands but perhaps that will improve with time. So as of today Oct. 13th, I'm still feeling well. I have much more energy and can do more in a day than before. I went into a store today and wandered around looking at things for an hour, just because i COULD!

## **Shirley M.**

---

My son went to Cabo at the beginning of September. His appointment went ahead as scheduled and did not cost a cent more than he was told beforehand. He was told that if he needed stents they would cost \$3,500 each, but it would be his choice to have them put in or not. Fortunately he didn't need them, so it was not a scam to charge more. The doctors and staff were very professional and my son and daughter in law were very impressed. They also loved Cabo and would like to go back some day, purely for vacation purposes.

He is doing well. He has a lot of his upper body strength back, can now tie his shoelaces, hold a knife and fork and write better than he has in years. He has more energy and doesn't need to nap any more. He has lost his brain fog. When he came back he was able to walk with his walker inside the house and was no longer dragging his foot. He started physio last week to help strengthen the muscles in his legs and the therapist thinks she will be able to help him with walking. He and his wife said Cabo was beautiful, but quite hilly so they couldn't do as much as they would have liked as it was hard in the wheelchair. There was lots to do and I think the clinic arranged some excursions for those who wanted them. Hope this helps put your fears to rest. Good luck with the procedure. Isabel T.

## **Isabel T.**

I had excellent results. I am walking without even a cane. My balance and energy are back to normal. I am clear thinking and I am pain free. I have my life back and wake up every morning eager to begin the day!!! The waits were long, but the care was very good. Thank you so very much.

### **Donna A.**

---

We are so excited.Improvements noted in Mexico are still present. Little leaps in mobility new every day.

### **Linda H.**

---

I'm feeling super! In fact better almost everyday. I'm walking in the pool now and trying out of water at home too...soon I'll leave this wheelchair behind. I've shared your address and my results with alot of MS people in our area and I hope they all come to see you.

### **Jean B**

---

I am feeling great. I am learning how to use quad canes. I could not have done that before the procedure. Thanks.

### **Wendy S.**

---

My procedure was on Dec. 1 and went very well. Improvements were slow, but noticeable by my husband. It is now 2 weeks later and things get better every day!!

### **Cheryl M.**

---

Had treatment in Cabo August 30th!! Fatigue gone..Vision much improved and if that is all I am soooo happy!!! Recommended it!!!!!!!!!! Had diagnostic done in the morning and treatment in the afternoon. Was sitting on hotel balcony at 6 pm that night eating my dinner!!!

## Janet F.

---

To All of you in Cabo or those going soon for CCSVI Testing and Treatment, May you all have greatly improved blood flow and drainage soon and may you experience a better quality of life.

## Deb T.

---

I AM ONE OF THE SUCCESSES OF THE TREATMENT FOR MS. I HAVE HAD MS FOR 18 YEARS AND HAVE BACKED UP MY PROGRESSION BY 10 YEARS. I HAVE RETURNED FROM LOS CABOS AND HAVE BEEN GIVEN ALL THE RESULTS OF MY MRI, DOPPLER TEST, AND THE PROCEDURE OF THE LIBERATION TREATMENT. MY NEUROLOGIST HERE IN QUEBEC DID NOT WANT THEM. THE TREATMENT IS NOT A CURE BUT A FEELING OF HAPPINESS

## Carol B.

---

I was treated on June 14th and am stronger in many ways. Expect results to continue for the next few months. Here's a hint though, ask your friends and relatives if THEY have noticed any changes. They can see things that you may not. Happy Liberation.

## Robert F.

---

Had great results!!

That horrible fatigue feeling is gone. Also noticed I dont have to rest my arms on the counter when drying my hair. My vision has improved along with the heaviness in legs.

So happy I invested in the treatment. I am hoping it just keeps getting better!!!

## Janet F.

---

We were very impressed, the hearing doctor and the neurologist. They were three very awesome people and we were very pleased with the treatment Mom received in Cabo. Please send our thanks to all three and a special thanks to the hearing doctor and Dr.Karla for their kindness and concern for mom. Hoping that Mom will feel better and better as time goes on.

## Shelly M

---

It was a pleasure to meet you all and thank you for your kind treatment. i do feel stronger, better balance, warm feet, place my feet better when walking. i have been taking physio ever week & hi protien boost as suggested by Dr.Anguiano. Thank you

## Ann B.

---

Christine is doing well. Her feet have feeling in them allowing her to walk far better. Her balance is much improved as her lack of dizziness. She has moderate improvement in the numbness in her fingers.

## Robert F.

---

Gerry is still feeling great. He has been doing a lot of heavy yard work.

He also has started driving car again, something he hasn't done for 4 years. He can walk at least 2 km. His thinking is clear and he can remember again. His balance is still good and so is his vision. We are so very grateful for the procedure.
